

SONIM XP1™ THERE IS NO COMPARISON

THE XP1 THRIVES UNDER CONDITIONS THAT ANNIHILATE ORDINARY PHONES

Sonim XP1™

- IP-54 Certified
- Ruggedization Mil Spec Approved
- Same Day In-Store Replacement
- 3-year unconditional guarantee

Sonim's XP1 — the world's toughest GSM mobile phone — was engineered to meet the needs of people whose phones need to perform perfectly under heavy use and harsh environmental conditions.

"If you're standing on a construction site with a welding tool in your hand, or are sitting in a catamaran with a hard wind in your face, you really don't need a fashion accessory nor a multimedia monster, you need a dependable working tool like the new XP1, built for extreme conditions."

Bob Plaschke, CEO of Sonim Technologies

Dirt, water, dust, sand, rain, heat, cold, drops, shocks — whatever life dishes out the XP1 can handle

It's the only ruggedized GSM phone that's IP-54 certified, water-resistant, and Mil Spec approved, equipped with Bluetooth communications, engineered to thrive in the most demanding situations and backed up by an unconditional 3-year guarantee.

CNET's Crave Blog stated *"When a company is brave enough to back its phone with an unconditional three-year guarantee and commission a "torture test" in Europe, you know that's no ordinary handset. The military-spec Sonim XP1 eats daily abuse like a piece of cake..."*

"Shock-proof, water-proof, and generally whack-proof" said Wired News

Gadgetell raved *"This kick-butt phone is tough, made for tough folks."*

"You'd really have to try to break this phone. Really." CoolestGadget.com

Aftonbladet, Scandinavia's largest newspaper, did an exhaustive review, awarded the XP1 four out of five stars, and concluded that the phone *"can withstand almost any abuse."*

"I love it!...you can't help but love a phone that is so perfectly designed for the market it's aiming at." Mobile Business Magazine
